FOR IMMEDIATE RELEASE

eMaint Enterprises marks 25th Anniversary as a Leading Provider of CMMS Software

Marlton, NJ (Vocus) December 15, 2010 - eMaint Enterprises, headquartered in Marlton, New Jersey has been providing [maintenance management software](#) solutions since 1986. 2011 marks an important milestone seldom reached in the technology and software sector – 25 years of service to clients ranging from small and medium-sized organizations to Fortune 500 corporations in over 25 countries.

eMaint's 25 years of experience coupled with a passionate commitment to the success of each client results in a winning statistic: **96% of eMaint customers renew their subscriptions** – a noteworthy measure of success. Legendary customer support coupled with multi-lingual product support and implementation services ensure repeated, scalable client success time and again.

eMaint's flagship product, X3 [CMMS](#), is a complete solution offering a wide range of features and settings that can be configured to meet an organization's specific needs, but the commitment to customer service is what creates longstanding relationships and satisfied clients. Global companies such as Crown Cork & Seal rely upon eMaint CMMS, not as a corporate mandate, instead, corporate word of mouth regarding repeated successful implementations has resulted in systemic organic application.

eMaint's strategy is to start local, at the departmental level, and over time go global - with a successful implementation, clients become champions for the affordable Software as a Service (SaaS) model; they know the rollout will be effective; the SaaS model makes it easy to share information.

eMaint X3 CMMS software encompasses functionality for managing work orders and work requests, [preventive maintenance](#), purchasing and inventory control, planning and scheduling, asset history, cost tracking, condition monitoring and robust reporting in one user-friendly and affordable solution. This on-demand solution can be accessed across multiple locations in multiple languages from any browser-based device (including smartphones) and is fully customizable.

The multi-lingual sales and support teams provide knowledgeable, personalized service and product support in English, Spanish and Portuguese to coach clients through a successful implementation and to ensure continued client satisfaction. At eMaint, the client relationship is the top priority.

About eMaint Enterprises, LLC

eMaint, the leader in on-demand CMMS solutions, has been providing maintenance management software solutions since 1986 and was one of the first CMMS providers to develop a completely web-based "Software as a Service (SaaS) model for more
